

Investment Objective

Ethical investing to achieve medium to high returns with a higher risk focus over the minimum recommended investment timeframe of 10+ years.

An ethical portfolio with a higher exposure to growth assets and a lower exposure to income assets. Investments are spread across multiple asset types, geographies, companies, and sectors to provide diversification. The investment strategy includes management of foreign currency exposure to New Zealand dollars.

The Fund invests globally but has a home bias to Australia and New Zealand. The fund is also carbon emissions neutral. Our ownership share of the CO₂ equivalents emitted by the companies we invest in is offset using carbon credits (at the cost of Pathfinder, not the Fund).

Investing Ethically

1. UN Sustainable Development Goals: Aspiring for investment decisions to contribute to UN Sustainable Development Goals.
2. Environmental, social and governance focus: Focusing investment into companies that rate higher on environmental, social and governance criteria.
3. Climate change awareness: Companies with a lower carbon intensity and a plan for managing the transition to a low carbon economy make better long-term investments.
4. Aware, Fair, Care: Avoiding investment in companies engaged in industries or activities seen as harmful.
5. Engagement and shareholder voting: Engaging and voting as a shareholder can bring about positive change.

Please refer to our Ethical Investment Policy for more details.

Investor Suitability

The Ethical Growth Fund is suited to an investor with a high tolerance to risk and a minimum investment timeframe of 10+ years.

The strategy has a greater weighting to growth assets compared to income assets. Consequently, there will be some volatility in the value of your investments which could result in low or negative returns on occasion.
